

SUMMARY

Laravel Backend Developer with over 4 years of experience in building scalable web applications and APIs. Skilled in PHP, MySQL, and RESTful services, with a strong focus on clean architecture and performance optimization. Proficient in developing AI-powered platforms, including CodeUI, an innovative tool that converts screenshots and designs into production-ready code using advanced AI algorithms. Experienced in Shopify development, Facebook/Google Ads, and D2C brand management. Successfully launched and managed e-commerce brands like Muscle-Factory UK, Wallish, and LVW, driving operational efficiency and growth.

EDUCATION

Galgotias University

MBA

July 2025

DDU Gorakhpur

BCA

Graduated: May 2023

Techpile Institue , Lucknow

Diploma In Web Development

Year: 2021

SKILLS

- Frontend Development: HTML, CSS, JavaScript , Vue Js , React (Basic)
- Backend Development: PHP, Laravel, NodeJS
- Database Management: MySQL
- API Development: RESTful APIs, API integration
- Mobile Development: Basic Flutter
- AI-Powered Platforms:
- CodeUI (AI-driven design-to-code conversion for frameworks like React, Vue, HTML/Tailwind, Bootstrap, Ionic)
- Anycharacter (AI-based facial transformation into fictional characters)
- E-commerce Platforms: Shopify (development and management)
- Digital Marketing:
- Google Ads (campaign setup and optimization)
- Facebook Ads (targeted advertising and analytics)
- D2C Brand Management (strategy and execution for brands like Muscle-Factory UK, Wallish, LVW)

PROFESSIONAL EXPERIENCE

Sr. Backend Developer

Niftel Communication Nov 2022 – Present

- **AiSurveyMaker.com** – Developed a complete AI-driven survey and quiz generation platform that allows users to create intelligent surveys powered by GPT models. Features include custom question logic, automated quiz grading, analytics dashboard, and export options for businesses and researchers.
- **CodeUI**: Developed an AI-powered platform that converts screenshots, sketches, mockups, or Figma designs into production-ready code with 99% pixel-perfect accuracy. Supports multiple frameworks and languages, including React, Vue, HTML/Tailwind, Bootstrap, Ionic, and more, with direct Figma integration and responsive design by default. Enabled hosting on subdomains, offering seamless workflow for developers and designers to generate code in seconds.
- **Anycharacter**: Created an AI-based software that transforms user faces into various characters, such as Iron Man and other fictional personas, using advanced facial recognition and image processing. Designed for creative applications, providing an intuitive interface for users to generate and customize character-based visuals.
- **Lead Management** – Lead Management & Distribution System – Architected a comprehensive CRM that automates lead capture, verification, scoring, and distribution across sales teams. Integrated real-time lead routing, status tracking, and API-based lead source connections. Features include auto-assignment, branch-based access, and compliance logging for lead traceability and conversion analytics.
- **Employee Management CRM (RMS)**: Designed to manage employee records, attendance, shift schedules, and reporting. Implemented modules for leave tracking, role-based access, and performance logs, ensuring efficient workforce management.
- **Accounts Management CRM**: Built to streamline the accounting team's workflow, including invoicing, payment tracking, reconciliation reports, and financial data access controls, enhancing operational efficiency for financial processes.
- **Hiproval CRM**: A comprehensive platform for lead generation, client management, sales pipeline tracking, and follow-up automation. Integrated email and SMS campaigns, status tracking, and lead scoring to optimize sales workflows.

Backend Developer

Mind You Infotech | May 2022 – Nov 2022

- **Gwala – Milk Delivery CRM:** Built a subscription-based milk delivery system with modules for daily delivery scheduling, subscription management, route planning, and payment tracking. Integrated SMS notifications and a flexible wallet system for customer credit handling.
- **Expert Bano – EdTech Platform:** Developed a scalable learning management system (LMS) for online classes, including features like student onboarding, video lectures, test series, and payment gateway integration. Focused on performance optimization and secure content delivery.
- **Community App – Social Media for a Specific Community:** Created a niche social media platform with user profiles, community feeds, post/comment functionality, and moderation tools. Enabled real-time chat, notification systems, and user engagement analytics tailored for the community.

Additional Projects

- **AI-Powered Email Management Chrome Extension:** Developed a Chrome extension to enhance email productivity with AI-driven features for summarizing, composing, and replying to emails. Implemented real-time email summarization, context-aware reply suggestions, and automated compose functionality using natural language processing (NLP). Integrated with Gmail and other email platforms, leveraging JavaScript, HTML/CSS, and RESTful APIs to ensure seamless user experiences and reliable performance. Addressed challenges like email extraction for various domains and real-time UI updates, ensuring robust functionality across browsers.
- **WhatsApp Marketing Software for Shopify and E-commerce Sellers:** Built a Watty-like WhatsApp marketing platform to automate marketing channels for Shopify and other e-commerce sellers. Enabled bulk messaging, personalized campaigns, and automation features such as scheduled messages, contact list management, and analytics tracking. Integrated with Shopify APIs for seamless customer data synchronization and utilized Laravel, PHP, and MySQL for scalable backend architecture. Supported multimedia attachments (images, videos, PDFs) and implemented safeguards to minimize WhatsApp bans, enhancing marketing efficiency and ROI for D2C brands.
